

Environmental Policy

IGT's goal is to create value for all its stakeholders. The Company is focused on supporting industry, community, and the global environment.

IGT is committed to complying with accepted environmental practices, including the commitment to meet or exceed all applicable regulatory obligations.

This policy covers all IGT's entities, affiliates, and facilities worldwide, and it is consistent with the positions taken by the trade associations of which IGT is a member.

IGT will actively seek to minimize the creation of waste, reduce the use of natural resources, and prevent pollution by establishing objectives and targets that aim to continually improve IGT's environmental management system.

IGT's main environmental commitments include:

Climate and Energy • Continue to improve IGT's energy performance.

Waste • Improve IGT's waste performance and recycling efforts.

Water • Monitor and reduce water consumption in operations.

Employees • Increase employee awareness and participation in environmental issues.
